

Laboratory Services

Smiths Metal Centres are experts in the supply and testing of engineering metals and plastics. Our UKAS accredited materials testing laboratory offers a wide range of services and our metallurgists undertake consultancy services in a variety of application areas.

We undertake both single-event materials testing and on-going sampling programmes that can be tailored to fit a customer's requirements. In addition, we are able to offer testing routines for specific customer applications enabling us to offer a supply route for materials with unique certification requirements.

Having invested in modern, computer controlled, testing equipment we are able to offer a fast turnaround on most testing requirements. We aim to understand all customer requirements and have experience within a wide range different industries. This gives us the ability to offer all our customers, large and small, a high quality cost-effective service.

Available Tests / Analysis

- Tensile Testing
- Charpy Impact Testing
- Chemical Analysis
- Metallurgical Analysis
- Corrosion Testing
- Hardness Testing
- Physical Properties Testing

Spectro Maxx Spark Emission Spectrometer giving a complete chemical analysis

Laboratory Equipment

Available Tests / Analysis	Equipment	Accredited by
Tensile Testing	<ul style="list-style-type: none"> 30 Tonne Tensile Tester (ASTM E8 & A370, BS EN ISO 6892-1 & BES EN 2002-1) Elevated Temperature Tensile Testing facilities to 200 °C (ASTM E21 & BS EN ISO 6892-2) 	
Charpy Impact Testing	<ul style="list-style-type: none"> 300J Impact Tester (ASTM E23 & A370) Cryogenic Cooling down to minus 60 °C 	
Chemical Analysis	Spectro Maxx Spark Emission Spectrometer for analysing: <ul style="list-style-type: none"> Iron Base Copper Base Nickel Base Aluminium Base Titanium Base Materials 	
Metallurgical Analysis and Corrosion Testing	Metallurgical Microscopes, sample preparation equipment and associated equipment to allow: <ul style="list-style-type: none"> Metallurgical Evaluation to ASTM A923 Method A Phase Balance Analysis to ASTM E582 Corrosion Testing to ASTM G48 + A923 Method C Grain Size Analysis to ASTM E112 	
Hardness Testing	<ul style="list-style-type: none"> Vickers (HV10 & HV30) and Rockwell C Hardness Testing 	
Physical Properties Testing	<ul style="list-style-type: none"> Hocking Electrical Conductivity Testing Fischer Ferrite Testing GAMMA-SCOUT Radiation Detector (Geiger Counter) 	

Services / Investigations

- Testing routines on materials prior to despatch to provide customers with additional quality assurance beyond that required by standard ISO 9001 quality systems.
- Positive Material Identification (PMI) or a more complicated chemical analysis and mechanical testing programme to provide complete conformance to specification testing.
- Material batch testing witnessed by an outside inspection Agency such as Lloyds Register of Shipping to ensure material traceability and integrity.
- Investigations into materials failing to perform as expected during machining, welding or anodising. Solutions can often be found very quickly without having to rely on the technical expertise provided by the material manufacturer.
- Advice on material/alloy selection, obsolete and unusual specifications and support for customers when drafting their own material specifications.

UK Service Centres:

Smiths Belfast **02895 908 897**
 Smiths Biggleswade **01767 604 704**
 Smiths Birmingham **0121 728 4940**
 Smiths Bristol **0117 971 2800**
 Smiths Chelmsford **01245 466 664**
 Smiths Gateshead **0191 469 5428**
 Smiths Horsham **01403 261 981**

Smiths Leeds **0113 307 5167**
